Gutter Guards

GreenFlow-Pro is manufactured from premium Polyether coated foam and has a support structure made from 50%+ Recycled polyethylene content.

GreenFlow-Pro is protected by a flame retardant coating which also provides strength and extreme weathering durability. It contains a UV Stabilizer to reduce the effects of sunshine on the surface and a Mold & Mildew inhibitor to offset any mossy build up when installed in moister climates.

GreenFlow-Pro can also support a heavy winter snow and ice pack, preventing Ice build up in the gutter and the consequential separation, damage and leaking that ice can cause to the gutter and roof line.

GreenFlow-Pro, when compared to Screens, Guards, or Covers, wins out in every category of effectiveness, ease of installation, durability, debris shedding ability, Environmental friendliness and sheer value for money.

GreenFlow-Pro, demonstrates the highest degree of consistency and effectiveness in the industry and is backed by a 25 year performance warranty.

FREE INSTALLATION through November 2009! Pricing starts at \$8.00 per foot.

Gutter Screen Installation

Keep leaves and debris from clogging your gutters and downspouts between cleanings with our gutter screens! Our 2 stage screens are made with 1/2" holes for the water to flow through. They also have a second layer of screening, with holes about the size of a pin head, so even the smallest of debris will be kept out of your gutters! They install flat across the top of the gutter, so they are not noticeable from the ground.

Available in both brown and white. \$2.25 per foot installed.

Not for use with cedar roof systems. Yearly cleanings are still recommended.

Heated gutter/Roof de-icing cables

We now offer the best of both when it comes to gutter/roof protection! Say good-bye to ice damming! Safe for use with Green Flo Pro, while they keep your gutters free of leaves, our self actuating cables will keep your roof and gutters free of snow and ice. We can even install outlets near the roofline to minimize cords running all over, and self actuating means, you plug them in, and forget about it! The colder it gets, the harder they work! Ask for details!
